### **Minong Flowage Drawdown Update – April 25, 2022**

The ice finally went off the main basin of the flowage yesterday thanks to the windy conditions we had. Washburn County Highway Department was notified, and instructions were given to RWE to begin filling the flowage this morning. As a reminder, during the time that we are bringing water up to normal pool elevation, we need to maintain minimum base flow on the Totagatic Rover. This means that the entire streambed needs to be covered with water. Hopefully with the rainy forecast we have, water levels will reach the target by Fishing Opener.

Regards,  
Minong Flowage Association Lake Management Committee
